Peace Walls

I felt uneasy as I stood in the Clonard Martyrs Memorial Garden. Built to honor Catholics who had fallen during the Troubles between Catholics and Protestants, the gardens were more of a brick patio with brick walls than a garden. A 40-foot-tall peace wall towered behind the gardens, and next to the garden stretching along the wall was a row of houses settled by Catholics. On the other side of the peace wall was the Protestant Shankhill neighborhood, where I had been 10 minutes earlier. My sense of unease came from a sound that I typically find comforting, children laughing.

I looked over the brick wall of the memorial garden to see the children. It was a scene I could see in my backyard on a summer evening, kids jumping on a trampoline (Fig. 7.1), but I did not see trees, grass, swing sets, barbeques, or the other familiarities of backyards in my neighborhood. The peace wall loomed behind the trampoline, and on the other side was the child’s home. The back side of his house was shielded by a rather large cage. I looked up at the wall again and realized the cage was there to protect the back door and windows from anything being flung over the wall from the Protestant Shankhill neighborhood into the Catholic Falls neighborhood.

Built beginning in the 1960s to separate Catholics and Protestants in hopes of suppressing violence, the Belfast peace walls have now stood 20 years longer than the Berlin Wall (1961–1989). This wall, which runs more than 3 miles (5 km) through the city, is the largest of the city's...
99 peace walls. The peace wall between Shankhill and Falls has five gates that are open between about 7 A.M. and 7 P.M., Monday through Friday. Otherwise, you have to go all of the way around the wall to get from one neighborhood to the next.

The peace walls are quite visible, but the residents of this area of Belfast also carry invisible lines in their minds of routes that are safe and paths that are not. Geographer Frederick Boal established through extensive field research in 1969 that Protestants and Catholics in Belfast chose to separate themselves in their rounds of daily activity, their activity spaces. Boal found that members of each group traveled longer distances to shop in grocery stores tagged as their respective religion, walked further to catch a bus in a neighborhood belonging to their own religion, gave their neighborhood different toponyms, read different newspapers, and cheered for different football (soccer) teams.

In the journal *Children's Geographies*, Madeleine Leonard (2006) studied how teens in Belfast negotiate living in interface areas where Catholic and Protestant neighborhoods meet and where violence and trauma occurred. She found that teens identify with the Protestant football team (the Rangers) or the Catholic football team (the Celts), but they consciously choose not to wear their team’s gear when they go into shared spaces such as leisure areas in the city. Likewise, teens who go into a park or shared public space report that they do not call each other by name if their names are commonly Catholic (like Paddy) or Protestant (like Billy).

Children growing up in religious interface areas around the world experience childhood in distinct ways, learning to choose when to share identities, what routes are safe, which door to use to enter a movie theater, which grocery store to shop, and which football team to support. Particularly violent religious interface areas like Palestine/Israel, Iraq, and Sudan appear on the news, but thousands of religious interface areas around the world, like Belfast, receive less global media attention while being a very real part of everyday life for the children, teens, and adults who live there.

In this chapter we study the origins, diffusions, and transformations of the world’s great religions, their regional patterns, and their cultural landscapes. As we will find, religion can unite and divide, flourish and stagnate, surge and fade. Understanding the changing map of world religions and the role of religion in culture is essential to appreciating human geography.

**Key Questions FOR CHAPTER 7**

1. What is religion, and what role does it play in culture?
2. Where did the world’s major religions originate, and how do religions diffuse?
3. How is religion seen in the cultural landscape?
4. What role does religion play in political conflicts?

**WHAT IS RELIGION, AND WHAT ROLE DOES IT PLAY IN CULTURE?**

Religion and language lie at the foundation of culture: Both confer and reflect identity. Like languages, religions are constantly changing. Although religious leaders and bureaucracies sometimes attempt to slow the pace of change, religions nevertheless change over time.

Religions diffuse through both contagious and hierarchical forms of expansion diffusion, as well as through relocation diffusion. In any of these cases, leaders or followers of a religion interact with people who do not espouse the religion, and the interactions sometimes lead to conversion. Spatial interaction occurs through migration, missionary efforts, and even conquest. Along these paths, major religions of the world have diffused.
FIELD NOTE

"Each religion approaches the disposition of the deceased in its own way, and cultural landscapes reflect religious traditions. In largely Christian, Western regions, the deceased are buried in cemeteries. The Hindu faith, which is predominantly found in India, requires cremation of the deceased. When the British colonized both India and Kenya in the late nineteenth and early twentieth centuries, they brought Indians to Kenya as 'bonded laborers' to lay the Kenya-Uganda railroad (Bhawmick 2008). The number of Indians in Kenya peaked at 175,000 in 1962 and is approximately 100,000 today, large enough to need a crematorium, the equivalent of a Hindu funeral home."

The cultural landscape is marked by religion—most obviously by church, synagogues, temples, and mosques, cemeteries and shrines, statues and symbols (Fig. 7.2). Other more subtle markers of religion dot the landscape as well. The presence or absence of shops selling alcohol or of signs depicting the human form in particular ways reflects prevailing religious views. Religion is also proclaimed in modes of dress (veils, turbans) and personal habits (beards, ritual scars). The outward display of religious beliefs often reveals the inward structure of a religion. For example, in the Islamic Republic of Pakistan, in 1991, the government proclaimed that possessing a beard would be a condition for the appointment of judges. The beard requirement was an outward display of religion, and it also shows the inward structure of Islam in Pakistan, where women have not been in a place of judicial power.

Religion is an extraordinarily difficult concept to define. Geographers Robert Stoddard and Carolyn Prorak define religion as "a system of beliefs and practices that attempts to order life in terms of culturally perceived ultimate priorities" (2004). They explain that the idea of "perceived ultimate priorities" is often expressed in terms of should: People explain and justify how they and others should behave based on their religious beliefs. From eating habits to dress codes, religions set standards for how adherents should behave (Fig. 7.3). "Shouldness" goes beyond religion to other belief systems, but in this chapter we focus on formal religions, their distribution, and their role in making and shaping places and cultures. The idea that a "good" life has rewards and that "bad" behavior risks punishment has an enormous influence on cultures, on how people behave, and on how people perceive and evaluate the behavior of others.

Religion is also seen in places and practices that do not involve large buildings or expansive cemeteries. We can see religion in the worship of the souls of ancestors who are thought to inhabit natural objects such as mountains, animals, or trees; in the belief that a certain living person possesses special abilities granted by a supernatural power; and in the belief in a deity or deities, as in the great world religions. In some places, societies are so infused with religion that religious tradition strongly influences behaviors during waking hours through ritual and practice and even during periods of sleep in prescribing what direction a person should face when sleeping.

Across the multitude of religions, some practices such as ritual and prayer are common. Rituals may mark important events in people’s lives: birth and death, attainment of adulthood, or marriage. Rituals are typically expressed at regular intervals in a routine manner, as is done on certain days in the Christian and Jewish worlds, certain times of the day in the Muslim world, or according to certain astronomical events in the Jewish, Hindu, Muslim, and Christian worlds. A common ritual is prayer, whether at mealtime, at sunrise and sundown, at night upon retiring, or in the morning when arising (Fig. 7.4).

Although religious beliefs and prescriptions influence many societies, in other places, religion, at least in its organized form, has become less significant in the lives of people. Secularism is the indifference to or rejection of formal religion. The most secular countries in the world today are in Europe. A 2009 Pew survey asked people in 56 countries how important religion is in their lives. Among the wealthiest countries surveyed, the United States stood out as the highest, with 55 percent of Americans surveyed saying religion is very important in
Figure 7.3
Pork Production and Religious Prohibitions. Pork is the most common meat source in China, but pork production is slim to none in predominantly Muslim countries, including Bangladesh and Indonesia and in the predominantly Hindu country of India, where pork consumption is prohibited for religious reasons. Source: Geographical Trends in Livestock Densities and Nutrient Balances, 2011. http://pigtrop.cirad.fr

their lives. Only 13 percent of people surveyed in France, 19 percent in Great Britain, and 7 percent in the Czech Republic agreed that religion is very important in their lives. Regionally, survey respondents in Sub-Saharan Africa, South Asia, Southwest Asia, and South America more strongly agreed that religion is very important in their lives: 98 percent in Senegal, 97 percent in Bangladesh, 95 percent in Indonesia, and 78 percent in Brazil.

Regardless of Europe's present-day secularism, religion certainly has had a critical role in the history of Europe. During the Middle Ages and into the colonial period, the Christian church was a dominant force politically, economically, and culturally in Europe. Because Christianity was a major part of life in Europe for

Figure 7.4
New York, United States. A Muslim man takes a break from serving food off a vendor cart to pray on a busy Manhattan street.
centuries, much of the region’s art, architecture, history, customs, and cultural norms derive from Christian beliefs and teachings. Even in a secular society, and regardless of your religious beliefs, what you eat, when you work, when you shop, and what you are allowed to do are influenced by religion.

Organized religions have had a powerful effect on human societies. Religion has been a major force in combating social ills, sustaining the poor, promoting the arts, educating the deprived, and advancing medical knowledge. However, religion has also blocked scientific study, encouraged the oppression of dissidents, supported colonialism and exploitation, and condemned women to an inferior status in many societies. Religion is, if nothing else, one of the most complex and often controversial aspects of the human condition.

Adherents of **monotheistic religions** worship a single deity, a God (‘Allah’ in Arabic). Believers in **polytheistic religions** worship more than one deity, even thousands. **Animistic religions** are centered on the belief that inanimate objects, such as mountains, boulders, rivers, and trees, possess spirits and should therefore be revered. Throughout much of human history, virtually all religions were either animistic, polytheistic, or both. Somewhere around 3500 years ago, however, a monotheistic religion developed in Southwest Asia called Zoroastrianism. Some believe that the monotheism of late Judaism, Christianity, and Islam can be traced to Zoroastrian influences. Others believe that Judaism itself was the first monotheistic religion. Whichever the case, the eventual diffusion of Christianity and Islam spread monotheistic ideas throughout much of the world and marked a major theological shift away from the long dominance of polytheistic and animist beliefs in most places. The transformation from polytheistic to monotheistic religions happened quite rapidly in Subsaharan Africa. In 1900, neither Islam nor Christianity had many followers in Subsaharan Africa. By 2012, the number of Muslims in Subsaharan Africa had grown from 11 million to 248 million, and the number of Christians had grown from 7 million to 517 million.

By 500 BCE, four major hearths of religion and philosophy had developed in the world (Fig. 7.5). From a hearth in South Asia, along the Indus River Valley, came Hinduism; from a hearth on the eastern Mediterranean came Judaism; from a hearth on the Huang He (Yellow River) Valley in China came Chinese philosophies; and from the northern shores of the Mediterranean Sea came Greek philosophy. These early-established religions and philosophies profoundly impacted other religions, as the arrows in Figure 7.5 demonstrate. Philosophies and religions diffused from their hearths, affecting one another and influencing the ways founders established newer religions. The two religions with the greatest number of

adherents in the world today, Christianity and Islam, were both influenced by Judaism and Greek philosophy.

**The World Map of Religions Today**

The map in Figure 7.6 provides a global overview of the distribution of the world's major religions. Any map of world religions is a generalization, and caution must be used when making observations from the map. First, the shadings on the map show the major religion in an area, thereby masking minority religions, many of which have a significant number of followers. India, for example, is depicted as a Hindu region (except in the northwest), but other religions, including Islam and Sikhism, attract millions of adherents in India. Of the 1.2 billion people in India, 161 million are Muslims, which makes India the third largest Muslim country in the world behind Indonesia and Pakistan.

Second, some of the regions shown as belonging to a particular religion are places where faiths have penetrated relatively recently and where traditional religious ideas influence the practice of the dominant faith. Many Christian and Muslim Africans, for example, continue to believe in traditional spirits even as they profess a belief in a universalizing religion. A 2010 Pew Research survey of 25,000 people in 19 African countries found that "Large numbers of Africans actively participate in Christianity or Islam yet also believe in witchcraft, evil spirits, sacrifices to ancestors, traditional religious healers, reincarnation and other elements of traditional African religions." The survey found that 25 percent of Christian Africans and 30 percent of Muslim Africans they interviewed believed in the protective

---

**Figure 7.6**

power of sacrifices to spirits or ancestors. The country with the highest percentage of respondents who held this belief was Tanzania with 60 percent, and the lowest was Rwanda with 5 percent.

In Cameroon, 42 percent of those surveyed believed in the protective power of sacrifices to spirits or ancestors. For example, the Bamileke tribe in Cameroon lives in an area colonized by the French, who brought Catholicism to the region. The Bamileke are largely Christian today, but they also continue to practice aspects of their traditional animist religion. Ancestors are still very important in the lives of the Bamileke; many believe ancestors decide everything for them. It is common practice to take the skull of a deceased male member of the tribe and place it in the basement of the home of the family's oldest living male. Birth practices also reflect traditional religious practices. The Bamileke bury the umbilical cord in the ground outside their home so that the baby remembers where he or she came from. Members of the Bamileke tribe also commonly have two weddings: one in the church and one traditional.

A final limitation of Figure 7.6 is that it does not reflect the rise in secularism in the world, especially in Europe. In many areas, many people have moved away from organized religion entirely. Thus, France appears on the map as a Roman Catholic country, yet a large proportion of people in France profess adherence to no particular faith.

Despite the limitations of the map of world religions, it illustrates how far Christian religions have diffused (2.2 billion adherents worldwide), the extent of the diffusion of Islam (1.6 billion), the connection between Hinduism (950 million adherents) and one of the world's major population concentrations, and the continued importance of Buddhism
(347 million followers) in parts of Asia. Many factors help explain the distributions shown on the map, but each of the widespread religions shares one characteristic in common: They are all universalizing religions. Universalizing religions actively seek converts because they view themselves as offering belief systems of universal appropriateness and appeal. Christianity, Islam, and Buddhism all fall within this category, and their universalizing character helps explain their widespread distribution.

Universalizing religions are relatively few in number and of recent origin. Throughout human history, a greater number of religions have not actively sought converts. Rather, a given religion has been practiced by one particular culture or ethnic group. In an ethnic religion, adherents are born into the faith and converts are not actively sought. Ethnic religions (405 million followers) tend to be spatially concentrated—as is the case with traditional religions, which are found primarily in small areas of Asia, the Pacific, Africa, and South America. The principal exception is Judaism (14 million adherents), an ethnic religion whose adherents are widely scattered through Southwest Asia, Europe, North America, and South America as a result of forced and voluntary migrations.

From the Hearth of South Asia

HINDUISM

In terms of number of adherents, Hinduism ranks third after Christianity and Islam as a world religion. Hinduism has over 1 billion adherents and is one of the oldest religions in the modern world, dating back over 4000 years, originating in the Indus River Valley of what is today part of Pakistan. Hinduism is unique among world religions in a number of ways. The religion does not have a single founder, a single theology, or agreement on its origins. The common account of the history of Hinduism holds that the religion is based on ancient practices in the Indus River cities of Mohenjo-Daro and Harappa. The ancient practices included ritual bathing and belief in reincarnation, or at least a long journey after death. The common history says that Aryans invaded (some say migrated into) the Indus region and gave the name Hinduism to the diverse religious practices of the people who lived along the Indus River.

Despite the ambiguous beginnings of Hinduism, one thing is certain: Hinduism is no longer associated with its hearth in Pakistan. The vast majority of Pakistanis are Muslim, and as Figure 7.6 demonstrates, the vast majority of Indians are Hindu. Archaeologists hypothesize that flooding along the Indus spurred the migration of early Hindus eastward to the Ganges River. The Ganges (Ganga, as Indians call it) is Hinduism’s sacred river. Hindus regard its ceaseless flow and spiritual healing power as earthly manifestations of the Almighty.

Just as there is no consensus on Hinduism’s origins, there is a lack of agreement on defining Hinduism relative to other major world religions. Some define Hinduism as a polytheistic religion because of the presence of many gods. However, many Hindus define their religion as monotheistic. The one god is Brahman (the universal soul), and the other gods in the religion are various expressions of Brahman. Western academics define Hinduism today as an ethnic religion because Hindus do not actively seek converts. At the same time, historical evidence shows Hindu migrating into Southeast Asia and diffusing their religion, as a universalizing religion would, before the diffusion of Buddhism and Islam into Southeast Asia (Fig. 7.7). Although Hinduism is now more of an ethnic religion, the religion has millions of adherents in the populous region of South Asia, extending beyond India to Bangladesh, Myanmar, Sri Lanka, and Nepal.

The Hindu religion is not centrally organized. The religion does not have an administrative or bureaucratic structure like Christianity and Islam. The Hindu religion does not have a prophet or a single book of scriptures, although most Hindus recognize the sacredness of the Vedas.

![Figure 7.7](image)

Angkor Wat, Cambodia. The extensive walled structure at the temple complex in Angkor Wat marks the earliest period of Hinduism’s diffusion into Southeast Asia. Eventually, Buddhism replaced Hinduism in Cambodia, and many Hindu temples such as this one were abandoned.
four ancient collections of texts that have particular sacred status.

Hinduism is a conglomeration of beliefs characterized by a great diversity of institutional forms and practices. The fundamental doctrine is karma, which has to do with the transferability of the soul. According to Hindu doctrine, all beings have souls and are arranged in a hierarchy. The ideal is to move upward in the hierarchy and then escape from the eternal cycle of reincarnation through union with Brahman (the universal soul). A soul moves upward or downward according to the individual's behavior in the present life. Good deeds and adherence to the faith lead to a higher level in the next life, whereas bad behavior leads to demotion to a lower level. All souls, those of animals as well as humans, participate in this process. The principle of reincarnation is a cornerstone of Hinduism.

Hinduism's doctrines are closely bound to Indian society's caste system, for castes themselves are steps on the universal ladder. The caste system locks people into particular social classes and imposes many restrictions, especially in the lowest of the castes and in those considered beneath the caste system, Dalits. Until a generation ago, Dalits could not enter temples, were excluded from certain schools, and were restricted to performing the most unpleasant tasks. The coming of other religions to India, the effects of modernization during the colonial period, the work of Mahatma Gandhi, and affirmative action policies helped loosen the social barriers of the caste system. Today the Indian government's affirmative action policies reserve seats in universities and jobs in government for scheduled castes, scheduled tribes, and Dalits.

DIFFUSION OF HINDUISM

Hinduism evolved in what is today Pakistan. From there, Hinduism migrated to the Ganges River and diffused throughout South Asia and into Southeast Asia before the advent of Christianity. Hinduism first attached itself to traditional faiths and then slowly replaced them. Later, when Islam and Christianity appeared and were actively spread in Hindu areas, Hindu thinkers attempted to integrate certain new teachings into their own religion. For example, elements of the Sermon on the Mount (Jesus' sermon in which he described God's love for the poor and the peacemakers) now form part of Hindu preaching, and Christian beliefs contributed to the weakening of caste barriers. In other instances, the confrontation between Hinduism and other faiths led to the emergence of a syncretic or compromise religion. Islam stimulated the rise of Sikhism, whose followers disapproved of the worship of idols and disliked the caste system but retained the concepts of reincarnation and karma. Given its current character as an ethnic religion, it is not surprising that Hinduism's geographical extent is relatively small. Throughout most of Southeast Asia, Buddhism and Islam overtook the places where Hinduism had diffused during its universalizing period. In overwhelmingly Muslim Indonesia, the island of Bali remains a Hindu outpost. Bali became a refuge for Hindu holy men, nobles, and intellectuals during the sixteenth century (Fig. 7.8), when Islam engulfed neighboring Java, which now retains only architectural remnants of its Hindu age. Since then, the Balinese have developed a unique faith, still based on Hindu principles but mixed with elements of Buddhism, animism, and ancestor worship. Religion plays an extremely important role in Bali. Temples and shrines dominate the cultural landscape, and participation in worship, festivals, and other ceremonies of the island's unique religion is almost universal. Religion is so much at the heart of Balinese culture that it is sometimes described as a celebration of life.

Outside South Asia and Bali, Hinduism's presence is relatively minor. Over the last two centuries, Hinduism has diffused to small parts of the world through migration. During the British colonial era, the British transported hundreds
of thousands of Hindu adherents as bonded laborers from India to their other colonies in East and South Africa, the Caribbean, northern South America, and the Pacific Islands (see Fig. 7.2). Because Hinduism is not a universalizing religion today, the relocation diffusion produced pockets rather than regions of Hinduism.

BUDDHISM

Buddhism splintered from Hinduism over 2500 years ago. Buddhism and several other religions appeared in India as a reaction to questions about Hinduism's teachings at the time. Reformers questioned Hinduism's strict social hierarchy that protected the privileged and kept millions in poverty. Prince Siddhartha, who was heir to a wealthy kingdom in what is now Nepal, founded Buddhism. Siddhartha was profoundly shaken by the misery he saw around him, which contrasted sharply with the splendor and wealth in which he had been raised. Siddhartha came to be known as Buddha, the enlightened one. He may have been the first prominent Indian religious leader to speak out against Hinduism's caste system. Salvation, he preached, could be attained by anyone, no matter what his or her caste. Enlightenment would come through knowledge, especially self-knowledge; elimination of greed, craving, and desire; complete honesty; and never hurting another person or animal.

After Buddha's death in the fifth century BCE at the age of 80, the faith grew rather slowly until the middle of the third century BCE, when the Emperor Asoka became a convert. Asoka was the leader of a large and powerful Indian empire that extended from the Punjab to Bengal and from the Himalayan foothills to Mysore. He not only set out to rule his country in accordance with the teachings of Buddha; but also sent missionaries to carry Buddha's teachings to distant peoples (Fig. 7.9). Buddhism spread as far south as Sri Lanka and later advanced westward toward the Mediterranean, north into Tibet, and east into China, Korea, Japan, Vietnam, and Indonesia, over a span of about ten centuries (Fig. 7.8). Although Buddhism diffused to distant lands, it began to decline in its region of origin. During Asoka's rule there may have been more Buddhists than Hindu adherents in India, but after that period Hinduism gained followers in India. Today Buddhism is practiced by relatively few in India, but it thrives in Sri Lanka, Southeast Asia, Nepal, Tibet, and Korea. Along with other faiths, Buddhism is part of Japanese culture.

Like Christianity and Islam, Buddhism changed as it grew and diffused, and now the religion is strongly regional with three major forms. Buddhism's various branches have an estimated 488 million adherents, with Mahayana, Theravada, and Vajrayana (Tibetan) Buddhism claiming the most adherents. Theravada Buddhism translates as "the way of the elders." The hearth of Theravada Buddhism was established first, and it was the first branch of Buddhism to diffuse, spreading to Sri Lanka, Myanmar (Burma), Thailand, Laos, and Cambodia. Theravada Buddhism holds that salvation is a personal matter, achieved through good behavior and religious activities, including periods of service as a monk or nun. Theravada Buddhists tie their teachings back to the historical Buddha and contend that their beliefs are the "true Buddhism."

Mahayana Buddhism was the second form of Buddhism established in northern India, and it diffused into China, Vietnam, Korea, and Japan. Mahayana Buddhism translates as
the greater vehicle," and the idea is that more people can achieve enlightenment through its teachings than through the strict teachings of Theravada Buddhism. The Buddha is regarded as a divine savior, and other great Buddhists are regarded as bodhisattvas (those who have reached enlightenment) and are worshipped along with the Buddha. Mahayana Buddhists do not serve as monks, but they spend much time in personal meditation and worship, believing that achieving enlightenment helps all beings on Earth. Mahayana Buddhism was influenced by Chinese and Japanese religions, including Taoism and Shintoism.

The third largest branch of Buddhism is Vajrayana (Tibetan), which emphasizes the role of the guru or lama as religious and political leader. Vajrayana Buddhism was the last branch to be established, diffusing north from India into Tibet and Mongolia. Gurus in Vajrayana Buddhism use mantras, tantras, and meditation to help followers achieve enlightenment faster than the bodhisattva approach in Mahayana Buddhism, which can take several lifetimes.

Buddhism has become a global religion over the last two centuries, diffusing to many areas of the world, but not without conflict in its wake. Militant regimes have attacked the religion in Cambodia, Laos, and Vietnam. In Thailand, Buddhism has been under pressure owing to rising political tensions. At the same time, Buddhism has gained adherents in the Western world.

SHINTOISM

Buddhism is mixed with a local religion in Japan, where Shintoism is found. This ethnic religion, which is related to Buddhism, focuses particularly on nature and ancestor worship (Fig. 7.10). The Japanese emperor made Shintoism the state religion of Japan in the nineteenth century, giving himself the status of divine-right monarch. At the end of World War II, Japan separated Shintoism from the emperor, taking away the state sanctioning of the religion. At the same time, the role of the emperor in Japan was diminished and given a ceremonial status. The number of Shinto adherents in Japan is somewhere between 105 and 118 million, depending on the source. The majority of Japanese observe both Buddhism and Shintoism.

From the Hearth of the Huang He River Valley

TAOISM

While the Buddha's teachings were gaining converts in India, a religious revolution of another kind was taking place in China. Two major schools of Chinese philosophy, Taoism and Confucianism, were forming. The beginnings of Taoism are unclear, but scholars trace the religion to an older contemporary of Confucius, Lao-Tsu, who published a volume titled Tao-te-ching, or "Book of the Way." In his teachings, Lao-Tsu focused on the proper form of political rule and on the oneness of humanity and nature: People, he said, should learn to live in harmony with nature. This idea gave rise to the concept of Feng Shui—the art and science of organizing living spaces in order to channel the life forces that exist in nature in favorable ways. According to tradition, nothing should be done to nature without consulting geomancers,
people who know the desires of the powerful spirits of ancestors, dragons, tigers, and other beings that occupy the natural world and can give advice on how to order things according to Feng Shui.

Among the Taoist virtues are simplicity and spontaneity, tenderness, and tranquility. Competition, possession, and even the pursuit of knowledge are to be avoided. War, punishment, taxation, and ceremonial ostentation are viewed as evils. The best government, according to Lao-Tzu, is the least government. Thousands of people began to follow Taoism. Taoist temples include statues of deities who teach specific lessons, along with the yin-yang symbol to remind followers of the duality of life, and swords to remind adherents that struggle is part of life.

**CONFUCIANISM**

Confucius lived from 551 to 479 BCE, and his followers constructed a blueprint for Chinese civilization in almost every field, including philosophy, government, and education. In religion, Confucius addressed the traditional Chinese tenets that included belief in heaven and the existence of the soul, ancestor worship, sacrificial rites, and shamanism. He held that the real meaning of life lay in the present, not in some future abstract existence, and that service to one's fellow humans should supersede service to spirits.

Confucianism is mainly a philosophy of life, and like Taoism, it had great and lasting impacts on Chinese life. Appalled at the suffering of ordinary people at the hands of feudal lords, Confucius urged the poor to assert themselves. He was not a prophet who dealt in promises of heaven and threats of hell. He denied the divine ancestry of China's aristocratic rulers, educated the landless and the weak, disliked supernatural mysticism, and argued that human virtues and abilities, not heritage, should determine a person's position and responsibilities in society.

After his death in 479 BCE, Confucius came to be revered as a spiritual leader, and his teachings diffused widely throughout East and Southeast Asia. Followers built temples in his honor all over China. From his writings and sayings emerged the Confucian Classics, a set of 13 texts that were the focus of education in China for 2000 years. Over the centuries, Confucianism (with its Taoist and Buddhist ingredients) became China's state ethic, although the Chinese emperor modified Confucian ideals over time. For example, one emperor made worship of and obedience to the emperor part of Confucianism. In government, law, literature, religion, morality, and many other ways, the Confucian Classics have been the guide for Chinese civilization.

**DIFFUSION OF CHINESE RELIGIONS**

Confucianism diffused early into the Korean Peninsula, Japan, and Southeast Asia, where it has long influenced the practice of Buddhism. More recently, Chinese immigrants expanded the influence of the Chinese religions in parts of Southeast Asia and helped to introduce their principles into societies ranging from Europe to North America.

The diffusion of Chinese religions even within China has been tempered by the Chinese government's efforts to suppress religion in the country. The communist government that took control of China in 1949 attempted to ban religion, in this case Confucianism, from public practice. But after guiding all aspects of Chinese education, culture, and society for 2000 years, Confucianism did not fade easily from the Chinese consciousness.

Geomancy is still a powerful force in China today, even in urban areas with large populations. Geographer Elizabeth Teather (1999) studied the rise of cremation and columbaria (resting places for ashes) in Hong Kong, investigating the impact Feng Shui has had on the structures and the continued influence of Chinese religious beliefs on burial practices in the densely populated city of Hong Kong. Traditional Chinese beliefs favor a coffin and burial plot aligned with Feng Shui teachings. However, with the growth of China's population, the government has strongly encouraged cremation over the past few decades. The availability of burial plots in cities like Hong Kong is quite low, and the costs of burial plots have risen in turn.

Teather explains that although cremation is on the rise in Hong Kong, traditional Chinese beliefs are dictating the final resting places of ashes. Most Chinese people, she states, have a "cultural need to keep ancestral remains appropriately stored and in a single place." In North America and Europe, a family often chooses to scatter the ashes of a cremated loved one, but a Chinese family is more likely to keep the ashes together in a single identifiable space so that they can return to visit the ancestor during Gravesweeping Festivals—annual commemorations of ancestors during which people visit and tend the graves of their ancestors. Teather describes how Feng Shui masters are consulted in the building of columbaria and how Feng Shui helps dictate the price placed on the niches for sale in the columbaria, with the lowest prices for the niches near the "grime of the floor."

**From the Hearth of the Eastern Mediterranean**

**JUDAISM**

Judaism grew out of the belief system of the Jews, one of several nomadic Semitic tribes living in Southwest Asia about 4000 years ago. The roots of Jewish religious tradition lie in the teachings of Abraham (from Ur), who is credited with uniting his people to worship only one God. According to Jewish teaching, Abraham and God have a covenant in which the Jews agree to worship only one God, and God agrees to protect his chosen people, the Jews.

The history of the Jews is filled with upheaval. Moses led them from Egypt, where they had been enslaved, to Canaan, where an internal conflict developed and the nation split into two branches, Israel and Judah. Israel was subsequently wiped out by enemies, but Judah survived longer, only to be conquered by the Babylonians and the Assyrians. The Jews regrouped to rebuild their headquarters, Jerusalem,
FIELD NOTE

"The Orthodox Jewish community in Long Beach, New York, is large enough that the Dunkin Donuts on Beech Street is kosher. Supervised by a Rabbi, kosher-prepared foods follow strict requirements of what foods can be eaten, what can be eaten together, how animals are slaughtered, and how foods are prepared. In addition to the kosher Dunkin Donuts, another sign of the large Orthodox Jewish community in Long Beach is the Eruv, a line encircling the town that distinguishes private space from public space. The Eruv is not noticeable, as it generally follows utility lines and the boardwalk. But the Eruv creates a private space that allows Orthodox Jews to carry keys, foods, and even babies on the Sabbath."

Figure 7.11
Long Beach, New York.

but then fell victim to a series of foreign powers. The Romans destroyed their holy city in 70 ce and drove the Jews away, scattering adherents to the faith to Europe and North Africa. Jews retained only a small presence on the eastern shores of the Mediterranean until the late nineteenth century.

Our map shows that, unlike most other ethnic religions, Judaism is not limited to contiguous territories. Rather, Judaism is distributed throughout parts of Southwest Asia and North Africa, Russia, Ukraine, Europe, and parts of North and South America (Fig. 7.6). According to The Atlas of Religion, of all the world's 14 million Jews, 40.5 percent live in the United States, 40.2 percent live in Israel, and then in rank order, less than 5 percent live in France, Canada, the United Kingdom, Russia, and Argentina. Judaism is one of the world's most influential religions, although it claims few adherents compared to Christianity, Islam, and Hinduism.

During the nineteenth century, a Reform movement developed with the objective of adjusting Judaism and its practices to current times. However, many feared that this reform would cause a loss of identity and cohesion, and the Orthodox movement sought to retain the old precepts. Orthodox Jews typically are the strictest followers of Jewish dietary laws requiring the consumption of kosher foods (Fig. 7.11). Between the Reform and Orthodox extremes is a sector that is less strictly orthodox but not as liberal as that of the reformers; it is known as the Conservative movement.

These three branches differ significantly in ideas and practices, but Judaism is united by a strong sense of ethnic distinctiveness.

DIFFUSION OF JUDAISM

The scattering of Jews after the Roman destruction of Jerusalem is known as the diaspora—a term that now signifies the spatial dispersion of members of any ethnic group. The Jews who went north into Central Europe came to be known as Ashkenazim, and the Jews who scattered across North Africa and into the Iberian Peninsula (Spain and Portugal) are called Sephardim. For centuries, both the Ashkenazim and the Sephardim were persecuted, denied citizenship, driven into ghettos, and massacred.

In the face of constant threats to their existence, Jews were sustained by extraordinary efforts to maintain a sense of community and faith. The idea of a homeland for the Jewish people, which became popular during the nineteenth century, developed into the ideology of Zionism. Zionist ideals are rooted in the belief that Jews should not be absorbed into other societies. The horrors of the Nazi campaign against Jews from the 1930s through World War II, when the Nazis established concentration camps and killed some six million Jews, persuaded many Jews to adopt Zionism. Jews from all over the world concluded that their only hope of survival was to establish a strongly defended homeland on the shores of
the eastern Mediterranean. Aided by sympathetic members of the international community, the Zionist goal of a Jewish state became a reality in 1948, when a United Nations resolution carved two states, Israel and Palestine, out of the territory of the eastern Mediterranean.

While adherents to Judaism live across the world, many Jews have moved to Israel since its establishment in 1948. The Israeli government passed the Law of Return in 1950, which recognizes the rights of every Jew to immigrate to Israel. In 2012, over 7000 Jews left the former Soviet Union for Israel, along with over 2000 Jews from the United States and Canada and over 2000 from France and the United Kingdom. Since the fall of communism in the former Soviet Union in 1989, more than one million people have migrated from the former Soviet Union to Israel.

CHRISTIANITY

Christianity can be traced back to the same hearth in the Mediterranean as Judaism, and like Judaism, Christianity stems from a single founder—in this case Jesus. Christian teachings hold that Jesus is the son of God, placed on Earth to forgive people of their sins and to teach people how to live according to God’s plan. Christianity split from Judaism, and it, too, is a monotheistic religion. Jesus of Nazareth was born in Bethlehem, and during his lifetime, he traveled through the eastern Mediterranean region preaching, performing miracles, and gaining followers. Christians celebrate Easter as the day Jesus rose from the dead after being crucified three days prior (Good Friday). According to Christian teaching, the crucifixion of Jesus fulfilled an ancient prophecy and changed the fate of Jesus’ followers by giving them eternal life.

The first split in Christianity, between Roman Catholicism and the Eastern Orthodox Church, developed over a number of centuries. At the end of the third century, the Roman Emperor Diocletian attempted to keep the empire together by dividing it for purposes of government. His divisions left a lasting legacy. When the Roman Empire fell and broke apart, the western region, centered on Rome, disintegrated. The eastern region, with Constantinople (now Istanbul in Turkey) at its heart, continued on, and later became known as the Byzantine Empire (Fig. 7.12). Christianity thrived there and radiated into other areas, including the Balkan Peninsula. This split into west and east at the end of the Roman Empire became a cultural fault line over time. It was formally recognized in 1054 CE when the Roman Catholic Church (centered in Rome) and the Eastern Orthodox Church (centered in Constantinople) separated.

The Eastern Orthodox Church suffered blows when the Ottoman Turks defeated the Serbs in Kosovo in 1389, the Turks took Constantinople in 1453, and the Soviet Union suppressed Eastern Orthodox churches in the twentieth century (Fig. 7.13).

The Roman Catholic Church claims the most adherents of all Christian denominations (more than 1 billion). Centered in Rome, Catholic theology teaches the infallibility of the pope in interpreting Jesu’s teachings and in formulating ways to navigate through the modern world. The power of the Roman Catholic Church peaked in the Middle Ages, when the Church controlled sources of knowledge and worked in conjunction with monarchs to rule much of western Europe.

During the Middle Ages, Roman Catholic authorities often wielded their power in an autocratic manner and distanced themselves from the masses. The widespread diffusion of the Black Death during the 1300s and the deaths that resulted caused many Europeans to question the role of religion in their lives. The Roman Catholic Church itself also experienced divisions within its hierarchy, as evidenced by the Western Schism during the early 1300s, which at one point resulted in three people claiming to be the pope. Reformers to the Church soon followed. During the fifteenth and sixteenth centuries, John Huss, Martin Luther, John Calvin, and others challenged fundamental teachings of Roman Catholicism and opposed the practices of Church leaders—leading to the Protestant Reformation. The Protestant sects of Christianity compose the third major branch of Christianity. Like Buddhism’s challenge to Hinduism, the Protestant Reformation affected Roman Catholicism, which answered some of the challenges to its theology in the Counter-Reformation.

Christianity is the largest and globally the most widely dispersed religion. Christian churches claim more than

The Roman Empire, Divided into West and East. This map reflects the split in the empire, with the western empire focusing on Rome and the eastern empire focusing on Constantinople. © H. J. de Blij, A. B. Murphy, and E. H. Fouberg, and John Wiley & Sons, Inc.
2.2 billion adherents, including some 558 million in Europe and the former Soviet Union; approximately 266 million in North America; about 531 million in Latin America; perhaps 517 million in Africa; and an estimated 286 million in Asia. Christians thus account for 31 percent of the members of the world's major religions. Roman Catholicism, as noted earlier, is the largest segment of Christianity. Figure 7.6 reveals the strength of Roman Catholicism in parts of Europe and North America, and throughout much of Central and South America. Among religious adherents in parts of North America, Australia, New Zealand, and South Africa, Protestant churches prevail. Eastern Orthodox churches have as many as 200 million followers in Europe, Russia and its neighboring states, Africa (where a major cluster exists in Ethiopia), and North America.

DIFFUSION OF CHRISTIANITY

The dissemination of Christianity occurred as a result of expansion combined with relocation diffusion. In western Europe, Christianity declined during the centuries immediately after the fall of the Roman Empire. Then a form of contagious diffusion took place as the religious ideas that had been kept alive in remote places such as coastal Ireland and Scotland spread throughout western Europe. In the case of the Eastern Orthodox faith, contagious diffusion took place from the religious heart in Constantinople to the north and northeast. Protestantism began in several parts of western Europe and expanded to some degree through contagious diffusion. Much of its spread in Northern and Central Europe, however, was through hierarchical diffusion, as political leaders would convert—sometimes to escape control from Rome—and then the population would gradually accept the new state religion.

The worldwide diffusion of Christianity occurred during the era of European colonialism beginning in the sixteenth century. Spain invaded and colonized Central and South America, bringing the Catholic faith to those areas. Protestant refugees who were tired of conflict and oppression in Europe came to North America in large numbers. Western European colonists, aided by missionaries, brought Catholicism to Congo, Angola, Mozambique, and the Philippines. The Christian faith today has over 33,000 denominations. Hundreds of these denominations engage in proselytizing (purposeful spreading of religious teachings) around the world, creating an incredibly complex geographical distribution of Christians within the spaces of the world map that are shaded in “Christian” (Fig. 7.6).

The Christian faith has always been characterized by aggressive and persistent proselytism, and Christian missionaries created an almost worldwide network of conversion during the colonial period that endures and continues to expand today (Fig. 7.14).

ISLAM

Like Christianity, Islam, the youngest of the major religions, can be traced back to a single founder, in this case, Muhammad, who was born in Mecca in 570 CE. According to Muslim belief, Muhammad received the truth directly from Allah in a series of revelations that began in 612 when the Prophet was about 42 years old. During these revelations, Muhammad spoke the verses of the Qu’ran (Koran), the Islamic holy book. Muhammad admired the monotheism of
Judaism and Christianity; he believed Allah had already revealed himself through other prophets, including Judaism's Abraham and Christianity's Jesus. Muhammad came to be viewed as the one true prophet among Muslims.

After his visions, Muhammad had doubts that he could have been chosen to be a prophet but was convinced by further revelations. He subsequently devoted his life to the fulfillment of the divine commands. In those days the eastern Mediterranean and the Arabian Peninsula were in religious and social disarray, with Christianity and Judaism coexisting with polytheistic religions. Muhammad's opponents began to combat his efforts. The Prophet was forced to flee Mecca, where he had been raised, for Medina, and continued his work from this new base.

In many ways, the precepts of Islam revised Judaic and Christian beliefs and traditions. The central precept of Islam is that there is but one god, who occasionally reveals himself through the prophets—first and foremost Muhammad, but Abraham and Jesus are regarded as non-divine prophets. Another key precept is that earthly matters are profane; only Allah is pure. Allah's will is absolute; he is omnipotent and omniscient. Muslims believe that all humans live in a world that was created for their use but only until the final judgment day.

Adherents to Islam are required to observe the "five pillars" of Islam (repeated expressions of the basic creed, frequent prayer, a month of daytime fasting, almsgiving, and, if possible, at least one pilgrimage to Mecca in one's lifetime). The faith dictates behavior in other spheres of life as well. Islam forbids alcohol, smoking, and gambling. In Islamic settlements, the people build mosques to observe the Friday prayer and to serve as social gathering places (Fig. 7.15).

Islam, like all other major religions, is divided—principally between Sunni Muslims (the great majority) and the Shi'ite or Shia Muslims (concentrated in Iran). Smaller sects of Islam include Wahhabis, Sufis, Salafists, Alawites, Alevis, and Yazidis. The religion's main division between Sunni and Shi'ite occurred almost immediately after Muhammad's death, and was caused by a conflict over his succession. Muhammad died in 632 CE, and to some, the rightful heir to the Prophet's caliphate (area of influence) was Muhammad's son-in-law, Ali. Others preferred different
candidates who were not necessarily related to Muhammad. The ensuing conflict was marked by murder, warfare, and lasting doctrinal disagreements. The Sunni Muslims eventually prevailed, but the Shi'ite Muslims, the followers of Ali, survived in some areas. Then, early in the sixteenth century, an Iranian (Persian) ruling dynasty made Shi'ite Islam the only legitimate faith of that empire—which extended into what is now southern Azerbaijan, southeastern Iraq, and western Afghanistan and Pakistan. This gave the Shi'ite branch unprecedented strength and created the foundations of its modern-day culture region centered on the state of Iran.

Descendants of Muhammad through his daughter Fatimah and his son-in-law Ali are recognized through titles that honor them, including sayyids, syeds or sharifs. They generate respect from both Sunni and Shi'ites. However, Shi'ites place much more emphasis on lineage. Shi'ite veneration of the descendants of Muhammad has contributed to a much more centralized and hierarchical clergy than that in the Sunni world.

In the Shi'ite branch, imams are religious leaders. Shi'ites treated the early Imams as the sole source of true knowledge, and their successors continue to have great social and political authority. Sunni Islam is less centralized; an imam is simply a religious leader or scholar. Nonetheless, the Sunni branch has given rise to more doctrinaire offshoots of the religion over the centuries.

**DIFFUSION OF ISLAM**

At the time of his death in 632 CE, Muhammad and his followers had converted kings on the Arabian Peninsula to Islam. The kings then used their armies to spread the faith across the Arabian Peninsula through invasion and conquest. Moving west, in waves of invasion and conquest, Islam diffused throughout North Africa. By the early ninth century, the Muslim world included emirates extending from Egypt to Morocco, a caliphate occupying most of Spain and Portugal, and a unified realm encompassing Arabia, the Middle East, Iran, and most of what is today Pakistan. Ultimately, the Arab Empire extended from Morocco to India and from Turkey to Ethiopia. Through trade, Muslims later spread their faith across the Indian Ocean into Southeast Asia (Fig. 7.16). As Muslim traders settling trading ports in Southeast Asia, they

---

**Figure 7.16**

Diffusion of Islam. The map shows the diffusion of Islam from 600 CE to 1600 CE. The hearth of Islam is the dark brown area on the map where Islam was established by 630. By 650, Islam diffused through the areas in tan and in orange. As of 700, Islam diffuses through the pink region of the map. By 900, Islam reached the area in light green in Spain, North Africa, and Central Asia. By 1200, Islam reached Indonesia through trade. Islam diffused into Southeast Europe, South Asia, and North Africa by 1600. © H. J. de Blij, P. O. Muller, and John Wiley & Sons, Inc.
established new secondary hearths of Islam and worked to diffuse the religion contagiously from the secondary hearths. Recent diffusion of Islam into Europe (beyond Spain and the Balkan Peninsula), South Africa, and the Americas has largely been a result of migration—or relocation diffusion.

Today, Islam, with more than 1.6 billion followers, ranks second to Christianity in global number of adherents. Islam is the fastest growing of the world’s major religions, dominating in Northern Africa and Southwest Asia, extending into Central Asia, the former Soviet Union and China, and including clusters in Indonesia, Bangladesh, and southern Mindanao in the Philippines. Islam is strongly represented in India, with over 161 million adherents, and in Sub-Saharan Africa, with approximately 248 million adherents. Islam has followers in Bosnia and Albania and has substantial numbers of adherents in the United States and western Europe (Fig. 7.17). The largest Muslim country is actually outside of the Middle East, in Southeast Asia. Indonesia has over 209 million adherents. In fact, of Islam’s 1.6 billion followers, more than 80 percent live outside Southwest Asia and North Africa (Pew Research Center 2012). And not everyone in Southwest Asia and North Africa is Muslim. The region is home to millions of Christians, Jews, and other smaller religious sects.

INDIGENOUS AND SHAMANIST

Finally, Figure 7.6 identifies large areas in Africa and several other parts of the world as “Indigenous and Shamanist.” Indigenous religions are local in scope, usually have a reverence for nature, and are passed down through family units and groups (tribes) of indigenous peoples. No central tenet or belief can be ascribed to all indigenous religions. We do not group indigenous religions because they share a common theology or belief system. Instead, we group indigenous religions because they share the same pressures from the diffusion of global religions—and they have survived (Fig. 7.18).

Shamanism is a community faith in which people follow their shaman—a religious leader, teacher, healer, and visionary. Various peoples in Africa, Native America, Southeast Asia, and East Asia have embraced shamans from time to time, and they had similar effects on the cultures of widely scattered peoples. Perhaps if these shamanist religions had developed elaborate bureaucracies and sent representatives to international congresses, they would have become more similar and might have evolved into another world religion. Unlike Christianity or Islam, the shamanist faiths are small and comparatively isolated.

Shamanism is an indigenous religion, an intimate part of a local culture and society, but not all indigenous religions are shamanist. Many indigenous African religions involve beliefs in a god as creator and provider, in divinities both superhuman and human, in spirits, and in a life hereafter. Christianity and Islam have converted many followers of indigenous religions, but as the map indicates, indigenous religions continue to have a strong presence in significant areas (Fig. 7.6).

THE RISE OF SECULARISM

The world map of religion might mislead us into assuming that all or even most of the people in areas portrayed as Christian or Buddhist do in fact adhere to these faiths. This is not
FIELD NOTE

"Arriving at the foot of erosion-carved Uluru just before sunrise, I do not find it surprising that this giant monolith, towering over the Australian desert, is a sacred place to local Aboriginal peoples. Throughout the day, the changing sun angle alters its colors until, toward sunset, it turns a fiery red that yields to a bright orange. At night it looms against the moonlit, starry sky, silent sentinel of the gods. Just two years before this, my first visit in 1987, the Australian government had returned Ayers Rock (named by European settlers after a South Australian political leader) to Aboriginal ownership, and reclaimed its original name, Uluru. Visitors continued to be allowed to climb the 1100 feet (335 m) to the top, from where the view over the desert is awesome.

My day had begun eventually when a three-foot lizard emerged from under my motel-room bed, but the chain-assisted climb was no minor challenge either. At the base you are warned to be `in good shape' and some would-be climbers don't make it, but the rewards of persisting are dramatic. Uluru's iron-rich sandstone strata have been sculpted into gullies and caves, the latter containing Aboriginal carvings and paintings, and on the broad summit there are plenty of places where you can sit quietly to contemplate the historic, religious, and cultural significance of a place that mattered thousands of years before globalization reached Australia."

---

Figure 7.18
Uluru, Australia.

the case. Even the most careful analysis of worldwide church and religious membership produces a total of about 5.8 billion adherents—in a population of over 6.9 billion (Pew Research Center 2012). The figure 5.8 billion adherents is inflated when we start to analyze the difference between those who say they are members of a religion and those who are active followers of a religion. When polled about their church-going activities, fewer than 3 percent of the people in Scandinavia reported frequent attendance, and in France and Great Britain, less than 10 percent reported attending church at least once a month. The lack of members active or otherwise underscores the rise of secularism—indifference to or rejection of organized religious affiliations and ideas.

The level of secularism throughout much of the Christian and Buddhist worlds varies from country to country and regionally within countries. A 2009 Pew Research poll asked whether people felt religion was very important to them. Only 24 percent of Italians agreed with this statement, whereas 55 percent of Americans felt religion was very important to them. In France, the government recently banned the wearing of overt religious symbols in public schools. The French government wanted to remove the "disruption" of Muslim girls wearing hijab (head scarves), Jewish boys wearing yarmulke (skullcaps), and Christian students wearing large crosses to school. The French government took the position that banning all religious symbols was the only egalitarian approach.

Looking at polls that ask about the importance of religion for people in a country does not give us the complete picture, however. The 30 percent of Canadians who agreed religion is very important to them would be much, much lower if we removed recent or second-generation immigrants from the tally. Immigrants often hold onto their religion more fervently in part to help them ease into a new place and to link into a community in their new home. Buddhists and Hindus on Canada's west coast and Muslims in the eastern part of Canada have a higher rate of adherence to their religion than many long-term residents of the country.

In some countries, antireligious ideologies are contributing to the decline of organized religion. Church membership in Russia, which dropped drastically during the twentieth century under communist rule, rebounded after the collapse of the Soviet system but to much lower numbers. Maoist China's drive against Confucianism was, in part, an antireligious effort, and China continues to suppress some organized religious practices, as reports of religious persecution continue to emanate from China.
In many areas labeled Christian on the world map of religions, from Canada to Australia and from the United States to western Europe, the decline of organized religion as a cultural force is evident. In the strongly Catholic regions of southern Europe and Latin America, many people are dissatisfied with the papal teachings on birth control, as the desire for larger families wanes in these regions of the world. In Latin America, the Catholic Church is being challenged by rapid social change, the diffusion of Evangelical Protestant denominations into the region, and sexual abuse scandals similar to those that have occurred in the United States and Canada.

Secularism has become more widespread during the past century. People have abandoned organized religion in growing numbers. Even if they continue to be members of a church, their participation in church activities has declined. Traditions have also weakened. For example, there was a time when almost all shops and businesses were closed on Sundays, preserving the day for sermons, rest, and introspection. Today, shopping centers are mostly open as usual, and Sunday is increasingly devoted to business and personal affairs, not to church. To witness the rise of secularism among Christians in America first-hand, explore your town, city, or suburb on a Sunday morning: How many people are wearing casual clothes and hanging out at the coffee shop reading newspapers, and how many people are attending church services?

At the same time that secularism is on the rise in the United States, many people who do follow their religion seem to be doing so more fervently. Religious traditions are stronger in some cultural regions of the United States than in others, and Sunday observance continues at a high level in, for example, the Mormon culture area of the United States. Even though Catholic dioceses are closing churches and declaring bankruptcy in some parts of the Northeast, other Catholic dioceses are building new churches and enormous activity halls in other parts of the country. Moreover, Evangelical and other alternative churches are growing rapidly in some parts of the United States and western Europe. Entire industries, including Christian music and Christian publications, depend on the growing commitment of many Americans and Europeans to their religion.

The division between secularism and fervent adherence is not confined to the Christian world. Secularism is growing in South Korea, where half of the population does not profess adherence to any particular religion. Although major faiths are experiencing an overall decline in adherence, several smaller religions are growing in importance: Baha’i, Cao Dai, Jainism, and the Spiritual Church of Brazil, for example.

HOW IS RELIGION SEEN IN THE CULTURAL LANDSCAPE?

Religion marks cultural landscapes with houses of worship such as churches, mosques, synagogues, and temples; cemeteries dotted with religious symbols and icons; stores designated for sales of religious goods; and even services provided to religious adherents who travel to sacred sites. When adherents voluntarily travel to a religious site to pay respects or participate in a ritual at the site, the act of travel is called a pilgrimage. Geographers who study religion are interested in the act of pilgrimage and its impacts on place, people, religion, culture, and environment.

Sacred sites are places or spaces people infuse with religious meaning. Members of a religious group may define a space or place as sacred out of either reverence or fear. If a sacred site is held with reverence, adherents may be encouraged to make a pilgrimage to the sacred site for rejuvenation, reflection, healing, or fulfillment of a religious commitment.

In ancient human history, sacred spaces were typically features in the physical geographic landscape, such as buttes, mountain peaks, or rivers. In more recent history, as universalizing religions diffused across the world, sacred sites were abandoned, usurped, or altered. Geographer Mary Lee Nolan studied Irish sacred sites and observed that many of the remote physical geographic features of the Irish landscape were sacred to the Celtic people (Fig. 7.19). When Roman Catholicism diffused to Ireland, the Catholic Church usurped many of these features, infusing them with Christian meaning. Nolan described the marriage of Celtic sacred sites and Christian meaning:

The early Celtic Church was a unique institution, more open to syncretism of old and new religious traditions than was the case in many other parts of Europe. Old holy places, often in remote areas, were “baptized” in the new religion or given new meaning through their historical, or more often legendary, association with Celtic saints. Such places were characterized by sacred site features such as heights, insularity, or the presence of holy water sources, trees, or stones.

Nolan contrasted Irish sacred sites with those in continental Europe, where sacred sites were typically built in urban, accessible areas. In continental Europe, Nolan found that the “sacred” (bones of saints or images) was typically brought to a place in order to infuse the place with meaning.

In many societies, certain features in the physical geographic landscape remain sacred to religious groups. Access to and use of physical geographic features are constrained by private ownership, environmental concerns, and the act of designating certain sacred spaces as public recreational or tourist areas. Geographer Kari Forbes-Boyte (1999) studied Bear Butte, a site sacred to members of the Lakota and Cheyenne people in the northern Great Plains of the United States and a site that became a state park in the 1960s. Bear Butte is used today by both Lakota and Cheyenne people in religious
GUEST FIELD NOTE

At St. Declan’s Holy Well in Ireland, I found a barbed wire fence substituting for the more traditional thorn tree as a place to hang scraps of clothing as offerings. This tradition, which died out long ago in most parts of Continental Europe, was one of many aspects of Irish pilgrimage that led me to speculate on ‘Galway-to-the-Ganges’ survival of very old religious customs on the extreme margins of an ancient Indo-European culture realm. My subsequent fieldwork focused on contemporary European pilgrimage, but my curiosity about the geographical extent of certain ancient pilgrimage themes lingered. While traveling in Asia, I found many similarities among sacred sites across religions. Each religion has formation stories, explanations of how particular sites, whether Buddhist monasteries or Irish wells, were recognized as sacred. Many of these stories have similar elements. And, in 1998, I traveled across Russia from the remote Kamchatka Peninsula to St. Petersburg. Imagine my surprise to find the tradition of hanging rag offerings on trees alive and well all the way across the Russian Far East and Siberia, at least as far as Olkon Island in Lake Baikal.

Figure 7.19

Admire, Ireland.

ceremonies and by tourists who seek access to the recreational site. Nearby Devils Tower, which is a national monument, experiences the same pull between religious use by American Indians and recreational use by tourists.

Places such as Bear Butte and Devils Tower experience contention when one group sees the sites as sacred and another group does not. In many parts of the world, sacred sites are claimed as holy or significant to adherents of more than one religious faith. In India, for example, several sites are considered sacred by Hindus, Buddhists, and Jains. Specifically, Volture Peak in Rajgir in northeastern India is holy to Buddhists because it is the site where Buddha first proclaimed the Heart Sutra, a very important canon of Buddhism. Hindus and Jains also consider the site holy because they hold Buddha to be a god or prophet. The site has created little discord among religious groups. Pilgrims of all faiths peacefully congregate in the place year after year. Other sacred sites are not so fortunate: Some of the most contentious sites are in Jerusalem, a city that three major world religions regard as holy.

Sacred Sites of Jerusalem

The ancient city of Jerusalem is sacred to Jews, Christians, and Muslims. Jews saw Jerusalem as sacred before the birth of Jesus, but most Jews fled from the city and surrounding area during the diaspora. For Jews, Jerusalem remained sacred even though they did not control it, and when the Zionist movement gained strength, Jews set their sights on controlling the sacred city once again. The most important sacred site for Jews is the Western Wall (also called the Wailing Wall), at the edge of the Temple Mount in Jerusalem (Fig. 7.20). The Temple Mount occupies the top of a modest hill where, according to the Torah (the sacred book of Judaism that is also part of the Old Testament of Christianity’s sacred book, the Bible), Abraham almost sacrificed his son Isaac. On this hill, Jews built two temples, each of which was destroyed by invaders. The Western Wall is all that remains of the second temple, and Jews gather in the place to remember the story of Abraham and the destruction of the temples and to offer prayers. The name “Wailing Wall” evokes the sounds of mourning over the temple’s demise made by Jewish pilgrims and recognizes the suffering of Jews over time.

For Christians, Jerusalem is sacred both because of the sacrifice Abraham was willing to make of his son at the Temple Mount and because Jesus’ crucifixion took place just outside of the city’s walls. Jesus was then buried in a tomb that Roman Emperor Constantine later marked with a basilica that is now the Church of the Holy Sepulchre (Fig. 7.21). Christians believe that from that tomb Jesus rose from the dead on Easter. For centuries the Roman, and then the Byzantine, Empire controlled the city and protected the sacred site.
In the seventh century, Muslim armies took control over the city from the Byzantine Empire. Muslims constructed a mosque called the Dome of the Rock adjacent to the Western Wall to mark the site where Muslims believe Muhammad arrived from Mecca and then ascended into heaven (Fig. 7.20). The site Jews call Temple Mount is called al-Haram al-Sharif (the Noble Sanctuary) by Muslims.

Christians and Muslims fought the Crusades of the Middle Ages over the question of who should control the sacred land of Jerusalem. Between 1095 and 1199, European political and religious leaders organized a series of Crusades to retake the so-called Holy Land. The first Christian crusaders captured Jerusalem in 1099, ruling the city for almost 100 years. As the first crusaders made their way across what is modern-day Turkey on their way to Jerusalem, they also left a series of conquests in their wake—laying claim to the city of Antioch and a number of other strategically important sites. Some of the crusaders returned to western Europe, but many settled, mingled, and intermarried with the local people.

Muslims ultimately retook Jerusalem in 1187, and later Christian crusaders were unable to conquer it again. The Crusades helped cement a commitment by Christians to protect the Church of the Holy Sepulchre. Similarly, the Crusades cemented a commitment by Muslims to protect the Dome of the Rock and later Zionism cemented a commitment by Jews to protect the Western Wall. The commitment by three major
religions to protect and control their sacred sites has led to political turmoil that echoes far beyond Jerusalem, as we will see in the next section of this chapter.

**Landscapes of Hinduism and Buddhism**

Traditional Hinduism is more than a faith; it is a way of life. Pilgrimages follow prescribed routes, and rituals are attended by millions of people. Festivals and feasts are frequent, colorful, and noisy. Hindus believe that the erection of a temple, whether modest or elaborate, bestows merit on the builder and will be rewarded. As a result, the Hindu cultural landscape—urban as well as rural—is dotted with countless shrines, ranging from small village temples to structures so large and elaborate that they are virtually holy cities. The location of shrines is important because Hindus prescribe that such holy places should minimally disrupt the natural landscape. Whenever possible, a Hindu temple is located in a “comfortable” position, for example, under a large, shady tree. Hindus also want their temples to be near water because many gods will not venture far from water and because water has a holy function, ritual bathing, in Hinduism (Fig. 7.22). A village temple should face the village from a prominent position, and followers must make offerings frequently. Small offerings of fruit and flowers lie before the sanctuary of the deity honored by the shrine.

The cultural landscape of Hinduism is the cultural landscape of India, its main culture region. As one travels through India, the Hindu faith is a visual as well as an emotional experience. Temples and shrines, holy animals by the tens of millions, distinctively garbed holy men, and the sights and sounds of long processions and rituals all contribute to a unique atmosphere (Fig. 7.23).

When Buddha received enlightenment, he sat under a large tree, the Bodhi (enlightenment) tree at Bodh Gaya in India. The Bodhi tree now growing on the site is believed to be a descendant of the original tree. The Bodhi tree has a thick, banyan-like trunk and a wide canopy of leafy branches. Because of its association with the Buddha, the tree is revered and protected. Buddhists make pilgrimages to Bodh Gaya and other places where Buddha may have taught beneath Bodhi branches. With Buddhism, the Bodhi tree diffused as far as China and Japan, its purposeful planting marking the cultural landscape of numerous villages and towns.

Buddhism’s architecture includes some magnificent achievements, especially the famed structures at Borobudur in central Java (Indonesia). Buddhist shrines include stupas, bell-shaped structures that protect burial mounds. Buddhists also construct temples that enshrine an image of Buddha in his familiar cross-legged pose, as well as large monasteries that tower over the local landscape. The pagoda is perhaps Buddhism’s most familiar structure. Its shape is derived from the relic (often funeral) mounds of old. Every fragment of its construction is a meaningful representation of Buddhist philosophy (Fig. 7.24).

**Varanasi, India.** Hindus perform morning rituals in the Ganges River at one of Hinduism’s most sacred places, the city of Varanasi, known as the city of Lord Shiva. For Hindus, the river itself is a sacred site.
FIELD NOTE

"In the summer of 2007, the newer, Hi-Tec city area of Hyderabad, India, was under construction. Migrant workers built new roads, apartment houses, and office buildings throughout the city. Beautiful homes reflected the wealth accrued by many. In front of the new homes, I saw Hinduism in the cultural landscape where owners built temples for their favorite Hindu god. In the older part of the city, I visited Golconda Fort, built more than 1500 years ago. On the day I was there, Hindu women participated in the Bonalu Festival as an act of honoring Mother Goddess. The women climbed nearly 400 steps to the top of the fort, carrying with them offerings of food. At the top, I was welcomed into the temple. I took off my shoes and took part in a festival that began in the mid-1800s, when Hindu women began the festival to ward off the anger of the gods, as the city stood under the siege of the bubonic plague."

Figure 7.23
Hyderabad, India.

FIELD NOTE

"To reach the city of Yangon, Myanmar (Burma), we had to transfer to a ferry and sail up the Rangoon River for several hours. One of Southeast Asia's most spectacular Buddhist shrines is the golden Shwedagon Pagoda in the heart of Yangon. The golden dome (or chedi) is one of the finest in Southeast Asia, and its religious importance is striking: eight hairs of the Buddha are preserved here. Vast amounts of gold have gone into the creation and preservation of the Shwedagon Pagoda; local rulers often gave the monks their weight in gold—or more. Today, the pagoda is a cornerstone of Buddhism, drawing millions of faithful to the site."

Figure 7.24
Yangon, Myanmar.
Along with the religious structures such as temples, we can see evidence of religion in the cultural landscapes of the dead. Traditionally, Hindus, and more recently Buddhists, and Shintoists cremate their dead. Thus, wherever a large pocket of Hindus, Buddhists, or Shintoists live, a crematorium will be nearby. The Hindu crematorium in Kenya stands in stark contrast to much of the rest of the cultural landscape and signals the presence of a large Hindu population (see Fig. 7.2).

The cultural landscapes of South Asian religions extend into Southeast Asia, where several religions that began in the South Asian hearth (including Hinduism and Buddhism) diffused into the region. Later, Islam replaced the South Asian religions in many of these places, and even later Christian missionaries gained adherents in Southeast Asia when Christian governments encouraged the migration of their people and their religion to their colonies in these areas. Today, we can stand in Singapore, study the cultural landscape, and see the influences of Christianity, Buddhism, Hinduism, and Islam.

**Landscapes of Christianity**

The cultural landscapes of Christianity’s branches reflect the changes the faith has undergone over the centuries. In medieval Europe the cathedral, church, or monastery was the focus of life. Other buildings clustered around the tower, steeple, and spire of the church that could be seen (and whose bells could be heard) for miles in the surrounding countryside (Fig. 7.25). In the square or plaza in front of the church, crowds gathered for ceremonies and festivals, and the church was always present—even if the event was not primarily religious. Good harvests, military victories, public announcements, and much else took place in the shadow of the symbol of religious authority. As a result of mercantilism and colonialism, Europeans exported the ornate architecture of European Christian churches wherever they settled (Fig. 7.26).

The Reformation, the rise of secularism, and the decline of organized religion are reflected in the cultural landscape as well. Many of the ornate churches in the town squares of medieval cities now function as museums instead of serving active congregations. Other churches in secular regions are closing their doors or

![Figure 7.25](image)

Antwerp, Belgium. The cathedral in Antwerp was built beginning in 1352 and still dominates the central part of town.

![Figure 7.26](image)

Mombasa, Kenya. Built at the end of the nineteenth century, the neo-gothic Holy Ghost Cathedral reflects the European colonial imprint on the city. The sign in the street next to the cathedral serves as a reminder of a more recent external cultural influence—this time from China. The number of Chinese in the city is not large, but Chinese immigrants have found niches in the restaurant business and as purveyors of Chinese traditional medicine.
significantly reducing the number of religious services offered. Yet, not all of Europe's sacred sites have become secularized. Famous cathedrals continue to hold services while tourists peruse the interior of the vast churches. And other sacred sites of Christianity, such as churches for specific saints, places where significant events occurred, and Vatican City in Rome, are still major pilgrimage sites in Europe. When in Rome, the leader of the Catholic Church, the pope, holds an outdoor service for pilgrims to Vatican City, attracting thousands of followers to St. Peter's Square each week (Fig. 7.27).

Cities in Europe are also home to centuries-old Christian cemeteries. Traditionally, Christians bury, rather than cremate, their dead, and in cities, the cemeteries are often crowded with tombstones. Outside of European cities and in North America, Christian cemeteries can resemble large parks. These cemeteries often reflect class differences: Some graves are marked by simple tombstones, whereas others are elaborate structures. With rising land-use pressures and the associated costs of burial, however, cremation is becoming increasingly common among Christians—particularly in North America and western Europe.

**RELIGIOUS LANDSCAPES IN THE UNITED STATES**

The United States, a predominantly Christian country, demonstrates considerable diversity in its religious cultural landscapes. In *The Cultural Geography* of the United States, geographer Wilbur Zelinsky constructed a map identifying religious regions in the country. Figure 7.28 presents a modified version of Zelinsky's map.

The New England region is strongly Catholic; the South's leading denomination is Baptist; the Upper Midwest has large numbers of Lutherans; and the Southwest is predominantly Spanish Catholic. The broad midland region extending from the Middle Atlantic to the Mormon region (in the western United States) has a mixture of denominations in which no single church dominates; this is also true of the West. As Figure 7.28 shows, some regions represent local clustering, such as the French Catholic area centered in New Orleans and the mixed denominations of Peninsular Florida, where a large Spanish Catholic cluster has emerged in metropolitan Miami.

In a 2008 study, geographers Barney Warf and Mort Winsberg used data on religious adherents by county in the United States to discern what counties and regions of the country have the most and the least religious diversity. Warf and Winsberg defined religious diversity as having a variety of religions within a small spatial unit, in this case a county. One way the authors mapped religious diversity is presented in Figure 7.29, a map showing counties with the least religious diversity in the darkest colors. In counties with the darkest shading, one religion accounts for 64 percent or more of all religious adherents in the county. In comparing Figure 7.29 to Figure 7.28, we can see that the Mormon region in Utah and southern Idaho, the Southern Baptist region in the South, and the Catholic region of the Northeast are some of the least diverse regions in the country. In these regions, you can expect to see the imprint of one major religion throughout the cultural landscape. By contrast, religious regions characterized by many lightly colored counties have a rich religious mix.
The plain white churches of the South and Lutheran Upper Midwest coincide with the Protestant Church’s pragmatic spending of church money—not on art and architecture as the Catholic Church historically did (Fig. 7.30). Conversely, many Catholic churches in the United States, both in the Northeast and in Chicago, as well as in other immigrant-magnet cities, were built by immigrants who lived in ethnic neighborhoods. Immigrants spent their own money and used their building skills to construct ornate churches and dozens of cathedrals that tied them back to their country of origin and demonstrated their commitment to their faith (Fig. 7.31).

Landscapes of Islam

Elaborate, sometimes magnificently designed mosques whose balconied minarets rise above the townscape dominate Islamic cities, towns, and villages. Often the mosque is the town’s most imposing and most carefully maintained building. Five times every day, from the towering minarets, the faithful are called to prayer. The sounds emanating from the minarets fill the streets as the faithful converge on the holy place to pray facing Mecca.

At the height of Islam’s expansion into eastern North Africa and southern Europe, Muslim architects incorporated earlier Roman models into their designs. The results included some of the world’s greatest architectural masterpieces, such as the Alhambra Palace in Granada and the Great Mosque of Cordoba in Spain. Islam’s prohibition against depicting the human form led to the wide use of geometric designs and calligraphy—the intricacy of which is truly astounding (Fig. 7.32). During the eleventh century, Muslim builders began glazing the tiles of domes and roofs.
**Figure 7.29**

Religious Diversity in the United States. The counties shaded in the darkest color have the least diversity in religions. The counties shaded in the lightest color have the most diversity within them. Compare and contrast Figure 7.28 with Figure 7.29 and explain which major religions in the United States are the dominant religions within their region. *Adapted with permission from: B. Walf and M. Winsberg, "The Geography of Religious Diversity in the United States," Professional Geographer, 2008.*

**Figure 7.30**

Brown County, South Dakota. The Scandinavian Lutheran Church was founded by immigrants from northern Europe. The simple architecture of the church is commonly found in Protestant churches in the Great Plains.

---

**Figure 7.31**

Zell, South Dakota. St. Mary's Catholic Church was built by nuns in 1875 to serve Catholic immigrants and American Indians. The more ornate architecture and stained glass of St. Mary's Church is commonly found in Catholic churches in the Great Plains.
To the beautiful arcades and arched courtyards, they added the exquisite beauty of glass-like, perfectly symmetrical cupolas. Muslim architecture represents the unifying concept of Islamic monotheism: the perfection and vestness of the spirit of Allah.

Islam achieved its greatest artistic expression, its most distinctive visible element, in architecture. Even in the smallest town, the community helps build and maintain its mosque. The mosque symbolizes the power of the faith and its role in the community. Its primacy in the cultural landscape confirms the degree to which, in much of the Muslim world, religion and culture are one.

One of the best-known pilgrimages in the modern world is the Muslim pilgrimage to Mecca, the hajj. The hajj is one of the five pillars of Islam. Religious doctrine implores all Muslims (if financially and physically able) to make the pilgrimage to Mecca at least once during their lifetime. Each year, over 1.3 million Muslims from outside of Saudi Arabia and over 1 million from inside the country make the hajj (Fig. 7.33). The pilgrimage requires the faithful to follow certain steps of reverence in a certain order and within a certain time frame. As a result, the pilgrims move from Mecca through the steps of the hajj en masse. In 2004, over 250 pilgrims were trampled to death as hordes of people followed the steps of the pilgrimage, and in 1990 over 1400 pilgrims suffered the same fate. The Saudi government now restricts the number of visas granted each year to Muslims from outside of the country. Yet, the number of pilgrims continues to climb, and the services needed for Muslim pilgrims during the hajj and during the rest of the year now employ four times as many people in Saudi Arabia as the oil industry does. The landscape around Mecca reflects the growing number of pilgrims year round, as towers of apartment buildings and hotels encircle the sacred city.

Geographer Surinder Bhardwaj has studied non-hajj pilgrimages in Islam, which include "visits to sacred shrines of holy men, the graves of saints and Imams, and the tombs of martyrs of the faith" (1998). Although some sects of Islam see non-hajj pilgrimage as non-Islamic, the ziarats (non-hajj pilgrimages) are important to a growing number of Muslims. Bhardwaj points out that the hajj is obligatory but the ziarat is voluntary. He explains that study of the ziarat helps geographers understand the many variations and regional forms of Islam in the world today. For example, Bhardwaj describes how the ziarat in Indonesia (the country with the largest number of Muslims) reflects the continued influence of pre-Islamic ways. Especially in the interior of Indonesia, Islam has mixed with Buddhism and Hinduism, both of which stress the importance of pilgrimage. Similar to Ireland, where the Catholic Church usurped Celtic sacred sites, Bhardwaj found that many sites in Indonesia that were sacred under Hinduism and Buddhism were usurped by Islam, which changed the object of pilgrimage from non-Muslim to Muslim.
Choose a pilgrimage site, such as Mecca, Vatican City, or the Western Wall, and describe how the act of pilgrimage (in some cases by millions) alters this place's cultural landscape and environment.

WHAT ROLE DOES RELIGION PLAY IN POLITICAL CONFLICTS?

Religious beliefs and histories can bitterly divide peoples who speak the same language, have the same ethnic background, and make their living in similar ways. Such divisions arise not only between people adhering to different major religions (as with Muslims and Christians in the former Yugoslavia) but also among adherents of the same religion. Some of the most destructive conflicts have pitted Christian against Christian and Muslim against Muslim.

Religious conflicts usually involve more than differences in spiritual practices and beliefs. Religion often functions as a symbol of a wider set of cultural and political differences. The "religious" conflict in Northern Ireland is not just about different views of Christianity, and the conflict between Hindus and Muslims in India has a strong political as well as religious dimension. Nevertheless, in these and other cases religion serves as the principal symbol around which conflict is organized.

Conflicts Along Religious Borders

A comparison between Figure 7.6 and a political map of the world (see Fig. 8.3) reveals that some countries lie entirely within the realms of individual world religions, whereas other countries straddle interfaith boundaries, the boundaries between the world's major faiths. Many countries that lie astride interfaith boundaries are subject to potentially divisive cultural forces—particularly when the people see their religious differences as a source of social division within their country. This is the case in several countries in Africa that straddle the Christian-Muslim interfaith boundary (Fig. 7.34). Other countries with major religious disputes straddle intrafaith boundaries, the boundaries within a single major faith. Intrafaith boundaries include divisions between Christian Protestants and Catholics (Northern Ireland), divisions between Muslim Sunni and Shi'ite (Iraq), and the like.

Interface areas, where interfaith and intrafaith boundaries occur, may be peaceful, or they can spur enormously violent political conflict. Israel/Palestine and Nigeria provide...
examples of interfaith conflicts, and Northern Ireland is an example of an intrafaith conflict. In each case, religious difference is not the only factor, but it certainly plays an important symbolic and perceptual role.

Israel and Palestine

Earlier in this chapter, we discussed the history of the conflict over the sacred space of Jerusalem. The region of Israel and Palestine is home to one of the most contentious religious conflicts in the world today. In the aftermath of World War I, European colonialism came to a region that had previously been controlled and fought over by Jews, Romans, Christians, Muslims, and Ottomans. A newly formed League of Nations (a precursor to the United Nations) recognized British control of the land, calling the territorial mandate Palestine. At that point, the vast majority of people living in the land were Muslim Palestinians. The goal of the British government was
to meet Zionist goals and to create, in Palestine, a national homeland for the Jewish people (who had already begun to migrate to the area). The British explicitly assured the world that the religious and civil rights of existing non-Jewish peoples in Palestine would be protected. The British policy did not produce a peaceful result, however. Civil disturbances erupted almost immediately, and, by 1947–1948, Jews and Palestinians engaged in open warfare.

In the wake of World War II and the Holocaust, many more Jews moved to the region. Shortly after the war, the British mandate ended, and the newly formed United Nations voted to partition Palestine—creating independent Israeli and Palestinian states. From the drawing of the first map, the partitioning plan was set for failure (see Fig. 3.11). Palestinians and Israelis were to live in noncontiguous states. Surrounding Arab states reacted violently against the new Jewish state. Israel survived through numerous wars in which Palestinians lost their lands, farms, and villages. As a consequence of war and the consolidation of the Israeli state, Palestinians migrated or fled to refugee camps in neighboring Arab states.

In the 1967 Arab–Israeli War, Israel gained control of the Palestinian lands in Gaza, the West Bank, and the Golan Heights. The international community calls these lands the Occupied Territories. The Jewish presence in Gaza has always been small. But over the last three decades, the Israelis have built Jewish housing settlements throughout the West Bank and have expanded the city of Jerusalem eastward into the West Bank (razing Palestinian houses along the way) to gain more control of territory. The Israeli government severely restricts new building by Palestinians, even on lands in the Palestinian zones of the West Bank. Events in the early and mid-1990s began to change this religious-political mosaic as self-government was awarded to Gaza and to small areas inside the West Bank. Palestinian Arabs were empowered to run their own affairs within these zones. Stability and satisfactory coexistence could lead to further adjustments, some thought—and eventually a full-fledged Palestinian state, but mistrust on both sides has kept that from happening.

In September 2005, the Israeli government shifted its policy toward the Gaza Strip. Israel evacuated the settlements that had been built there, burned down the buildings that remained (Fig. 7.35), and then granted autonomy to Gaza. The Palestinians living in the Gaza Strip rejoiced—visiting the beaches that were previously open only to Israeli settlers and traveling across the border into Egypt to purchase goods. Although Palestinians now have a degree of autonomy within the Gaza Strip, they are economically isolated, the standard of living has dropped, and continued conflict with Israel has taken a major toll.

The Israeli government tightly controls the flow of Palestinians and goods into and out of the Gaza Strip. Gaza is surrounded by fences, and in some places a wall—with land mines in certain areas and dust roads to show footprints. Dozens of tunnels between Egypt and Gaza have been used to supply arms, fuel, and goods to the Hamas government in Gaza. In 2014, Egypt agreed with Israel to recognize Hamas as a terrorist organization and to shut down the flow of goods through the tunnels.

The situation in the West Bank is slightly different from that in the Gaza Strip. Palestinian lands in the West Bank are not contiguous, and the Palestinian government is located in Gaza, not the West Bank. Israel is also building fences in the West Bank, not following the 1947 West Bank border but instead carving out Israeli settlements in the West Bank to include them on Israel’s side of the fence.

The situation in Israel and Palestine today does not reflect a simple interfaith boundary. The tiny region has a multitude of interfaith boundaries, especially in the West Bank (Fig. 7.36). The settlements in the West Bank have produced many miles of interfaith boundaries within a small political territory. In the Gaza Strip, Israel has
worked to secure the interfaith boundary by building a wall around Gaza to keep Palestinians in the territory and out of Israel. Tensions have mounted, and both sides took to air attacks across the walled boundary in the summer of 2014. The prospects for peace between Israelis and Palestinians are greatly complicated by the fact that each side feels it has a historic (in the minds of some, even a divine) right to the land and by the violence inflicted on each side by the other.

**Nigeria**

Like other countries in West Africa, Nigeria is predominantly Muslim in the north, and Christian and animist in the south. With over 168 million people, Nigeria is Africa’s most populous country. Since 1999, when the country emerged from years of military rule, Nigeria has witnessed persistent violence along the interfaith boundary between these communities, which has cost tens of thousands of lives.

As with many such conflicts, the causes of north–south violence in Nigeria cannot be attributed solely to different religious beliefs. Due to differences in climates, in northern Nigeria, many people engage in cattle herding, whereas in the south of the country, most rural peoples are farmers. As land has become scarcer, the fertile grasslands of central Nigeria have become coveted by both cattle herders and farmers. In addition to forms of agriculture, the north and south of Nigeria differ on several fronts (Fig. 7.37). Nigeria has a rich oil economy, and the oil economy and jobs tied to it are concentrated in the south. Southern Nigeria has higher per capita GDP and greater concentration of wealth than northern Nigeria. Northern Nigeria is dominated by the Hausa-Fulani ethnic group while the south is more diverse. Western-style education is more accepted in the south than in the north, and the south has higher female literacy rates than the north. Finally, access to health care, as reflected in the percentage of 1-year-olds who have received all the basic vaccinations, is higher in the south than the north.

---

**Figure 7.37**

*The North and South of Nigeria.* Nigeria’s oil resources are concentrated in the south. Northern Nigeria has lower GDP per capita rates, lower levels of female literacy, and less access to health care than southern Nigeria. Northern Nigeria is dominated by two ethnic groups, the Hausa-Fulani and Kanuri, both predominantly Muslim, and southern Nigeria has more diverse ethnic groups, whose members are predominantly Christian or animist. *Data from: Nigeria Demographic and Health Survey 2008, platts.com; wikipedia.org; africacentre.org; and bbc.com.*
Since 2009, the worst violence in Nigeria has taken place in the northern half of the country, along the interfaith boundary and in the northeast where the extremist Muslim group, Boko Haram, operates. Mohammed Yusuf began the organization in 2002 in Maiduguri, Nigeria, with the goal of pushing Western-style education out of northern Nigeria. The words "Boko Haram" roughly translate to "Western education is forbidden" in the Hausa language. Yusuf built an Islamic school, which drew mainly students from the Kanuri ethnic group. Yusuf then used the school to recruit members to Boko Haram. The U.S. State Department reported that Boko Haram "receives the bulk of its funding from bank robberies and related criminal activities, including extortion and kidnapping for ransom" and has received some funds and training from al-Qaeda in the Islamic Maghreb (2014).

In 2009, Nigerian police killed the founder of Boko Haram. In response, members armed themselves, found a new leader, and began issuing attacks in 2011. At first, the group focused attacks on police and military as vengeance for the killing of their leader. In 2012, Boko Haram turned their attention to attacking schools (New York Times 2014). In 2014, northern Nigeria made global news when members of the terrorist organization kidnapped 250 teenage girls from their school in Chibok (Fig. 7.38).

The violence may have its roots in the struggle for access to land, political power, and resources, but religion has served as a key marker of difference in the region. Violence along the interfaith Christian-Muslim boundary reinforces the perceptual importance of the boundary and promotes a sense—whether right or wrong—that religious differences represent the most important obstacle to social cohesion in Nigeria.

### Northern Ireland

A number of western European countries, as well as Canada and the United States, have large Catholic communities and large Protestant communities, and often these are reflected in the regional distribution of the population. In most places, the split between these two sects of Christianity along intrafaith lines creates little if any rift today. The most notable exception is Northern Ireland.

Northern Ireland and Great Britain (which includes England, Scotland, and Wales) form the United Kingdom of Great Britain and Northern Ireland (the UK). This was not always the case. For centuries, the island of Ireland was its own entity, marked by a mixture of Celtic religious practices and Roman Catholicism. As early as the 1200s, the English began to infiltrate the island of Ireland, taking control of its agricultural economy. Colonization began in the sixteenth century, and by 1700, Britain controlled the entire island. During the 1800s, the Irish colony produced industrial wealth for Britain in the shipyards of the north. Protestants from the island of Great Britain (primarily Scotland) migrated to Ireland during the 1700s to Northern Ireland to take advantage of the political and economic power granted to them in the colony. During the 1800s, migrants were drawn to northeastern Ireland where industrial jobs and opportunities were greatest. During the colonial period, the British treated the Irish Catholics harshly, taking away their lands, depriving them of their legal right to own property or participate in government, and regarding them as second-class citizens.

In the late 1800s, the Irish began reinvigorating their Celtic and Irish traditions; this strengthening of their identity fortified their resolve against the British. In the early 1900s,
the Irish rebelled against British colonialism. The rebellion was successful throughout most of the island, which was Catholic dominated, leading to the creation of the Republic of Ireland. But in the 1922 settlement ending the conflict, Britain retained control of six counties in the northeast, which had Protestant majorities. These counties constituted Northern Ireland, which became part of the United Kingdom. The substantial Catholic minority in Northern Ireland, however, did not want to be part of the United Kingdom (Fig. 7.39)—particularly since the Protestant majority, constituting about two-thirds of the total population (about 1.6 million) of Northern Ireland, possessed most of the economic and political advantages.

As time went on, economic stagnation for both populations worsened the situation, and the Catholics in particular felt they were being repressed. Terrorist acts by the Irish Republican Army (IRA), an organization dedicated to ending British control over all of Ireland by violent means if necessary, brought British troops into the area in 1968. Although the Republic of Ireland was sensitive to the plight of Catholics in the North, no official help was extended to those who were engaging in violence.

In the face of worsening conflict, Catholics and Protestants in Northern Ireland increasingly distanced their lives and homes from one another. The cultural landscape marks the religious conflict, as each group clusters in its own neighborhoods and celebrates either important Catholic or Protestant dates (see Fig. 6.11). Irish geographer Frederick Boal wrote a seminal work in 1969 on the Northern Irish in one area of Belfast. Boal used fieldwork to mark Catholic and Protestant neighborhoods on a map, and he interviewed over 400 Protestants and Catholics in their homes. Boal used the concept of activity space to demonstrate how Protestants and Catholics had each chosen to separate themselves in their rounds of daily activity.

Although religion is the tag-line by which we refer to "The Troubles" in Northern Ireland, the conflict is much more about nationalism, economics, oppression, access to opportunities, terror, civil rights, and political influence. But religion and religious history are the banners beneath which the opposing sides march, and church and cathedral have become symbols of strife rather than peace.

Belfast now has 99 peace lines, or peace walls, separating Catholic and Protestant neighborhoods. In the 1990s,
Boal updated his study of Northern Ireland and found hope for a resolution. Boal found that religious identities were actually becoming less intense among the younger generation and among the more educated. He found Catholics and Protestants intermixing in spaces such as downtown clubs, shopping centers, and college campuses.

In April 1998, the parties involved in The Troubles adopted the Anglo-Irish peace agreement known as the Belfast Agreement and Good Friday Agreement, which raised hopes of a new period of peace in Northern Ireland.

In her 2006 study, Leonard found teens that grew up in Catholic or Protestant neighborhoods rarely interacted with the “Other” and that “some children restricted their movements” to local neighborhoods and demonstrated little mobility beyond their respective neighborhood. Belfast, and Northern Ireland more broadly, have made major strides toward reconciliation in recent years. Mixing across Christian faiths is more common among the educated and less common among those living in distinctly Catholic or Protestant neighborhoods. The two sides have made major strides toward reconciliation in recent years, but the conflict has not gone away.

Religious Fundamentalism and Extremism

The drive toward religious fundamentalism is often born out of frustration over the perceived breakdown of society’s morals and values, lack of religious authority, failure to achieve economic goals, loss of a sense of local control, failure of a government to protect a religion, or a sense of violation of a religion’s core territory. Regardless of the religion, a fundamentalist group holds its religious beliefs as non-negotiable and uncompromising.

People in one society often fear fundamentalism in other societies without recognizing it in their own. What many call fundamentalism is sometimes better defined as extremism. Religious extremism is fundamentalism carried to the point of violence. The attacks on the United States in September 2001 reinforced the tendency of many Americans to equate extremism with Islam. Yet Christian extremism is also a potent force, as witnessed in the United States when religious zealots kill physicians who perform legal abortions. Fundamentalists can be extremists, but by no means are all fundamentalists, whether Christian, Muslim, Jewish, or any other religion, extremists.

Today the forces of globalization affect religions. Education, radio, television, and travel have diffused notions of individual liberties, sexual equality, and freedom of choice—but also consumerism and secularism. In the process, the extent of cultural diffusion and innovation has accelerated. Some churches have managed to change with the times, allowing women to serve as priests and homosexuals to marry, and generally liberalizing their doctrines. Others have gone in the opposite direction, reaffirming fundamental or literalist interpretations of religious texts and trying to block modern influences and external cultural interference.

CHRISTIANITY

The Roman Catholic Church has long resisted innovations deemed incompatible with the fundamentals of the faith. Among the issues giving rise to disputes are birth control, family planning, and the role of women in the religious bureaucracy. The major religions tend to be male-dominated, and few women have managed to enter the hierarchy. This is true in the Roman Catholic Church, where women are not allowed to serve as priests. The Roman Catholic Church has over 1 billion adherents and has a global diplomatic and political presence, affecting policies in numerous places and on many topics. For example, the Roman Catholic Church preaches against the use of artificial means of birth control as well as abortion. During the September 1994 United Nations Conference on Population and Development, the Roman Catholic Church allied itself with Islamic countries against advocates of population control.

In the United States, certain sects of the Catholic Church continue to hold Mass in Latin and are much more fundamentalist than the rest of the Church. Some of these sects are part of the Catholic Church and continue to operate within the purview of the Church. Others stand apart from the Catholic Church and do not recognize the pope, nor does the Vatican sanction them. For example, actor/director Mel Gibson belongs to the Holy Family Church, which does not recognize the pope, and the Vatican does not recognize that church as part of the Catholic Church. Gibson’s church is most associated with the Traditionalist Catholic Movement, a fundamentalist movement that believes the Mass should still be conducted in Latin and that modern popes and clergy are not following the traditional theology and practices of the Church.

In the United States, Christian fundamentalism is also associated with Protestant faiths. Preaching a doctrine of strict adherence to the literal precepts of the Bible, many Protestant Christian fundamentalists believe that the entire character of contemporary society needs to be brought into alignment with biblical principles. Fundamentalist Protestant churches range from tiny churches to enormous warehouse-style churches with thousands of members. Regardless of the size of the congregation, fundamentalist Protestant churches have become increasingly active in political and social arenas—arguing for prayer in public schools, the teaching of creationism in science courses, a strict ban on abortion, and the adoption of laws outlawing gay marriage (Fig. 7.40). In the process, they have gained considerable influence, especially in local politics (school boards and city councils).

JUDAISM

Like all other major religions, Judaism has fundamentalist sects. The most conservative of the three major sects of Judaism is Orthodox. Yet, the Orthodox sect itself is divided into
several different schools of thought, teachings, and synagogues. Much diversity exists among Orthodox Jews, with varying views on Israel, education, and interaction with non-Orthodox Jews. Fundamentalist Jews who have migrated to Israel tend to vote for more conservative candidates in Israeli elections, affecting election outcomes. Similarly, some fundamentalist Jews who remain in Europe or North America send money to certain politicians in Israel in support of policies such as Israeli settlements on the West Bank.

Judaism also has its extremist element—people whom the majority of Jews denounce and whom the government of Israel has even banned from the country. Among the Jewish extremist groups is the Kach and Kahane Chai—followers of the late American-born, Israeli Rabbi Meir Kahane. Rabbi Kahane espoused anti-Arabism in his teachings, and his followers (Kahane Chai) continue to do so. Members of Kach or Kahane Chai are suspected in several terrorist acts in Israel.

**ISLAM**

Other major faiths must also confront the pressures of change. Not all Muslim communities, for example, adhere precisely to the rules of the Qu’ran prohibiting the use of alcohol. The laws of Islam, which (like some other religions) are very strict when interpreted literally, are not applied with equal force throughout the Muslim world.

Prior to September 11, the growth of a fundamentalist movement, the Taliban in Afghanistan, provided a particularly striking example of how quickly a fundamentalist government can use extremism to change a place. The Taliban regime seized control of much of the country during the 1990s and asserted the strictest fundamentalist regime in the contemporary world. The leadership imposed a wide range of religious restrictions, sought to destroy all statues depicting human forms, required followers of Hinduism to wear identifying markers, and forbade women to appear in public with their head exposed.

The Taliban in Afghanistan also provided a haven for the activities of Islamic extremists who sought to promote an Islamic holy war, or jihad, against the West in general and the United States in particular. One of the key figures in the Islamic extremist movement of the past decade, Osama bin Laden, helped finance and mastermind a variety of terrorist activities conducted against the United States, including the destruction of the World Trade Towers, the attack on the Pentagon, and the downing of Flight 93 on September 11, 2001. Bin Laden is now dead, but those following in his footsteps are a product of a revolutionary Islamic movement that...
views the West as a great enemy and that opposes both the westernization and liberalization of the traditionally Islamic realms. These beliefs are certainly not representative of Islam as a whole, but they are religious beliefs. Indeed, they can be traced to a form of Islam, known as Wahhabi Islam, which developed in the eighteenth century in opposition to what was seen as sacrilegious practices on the part of Ottoman rulers. The champions of the opposition movement called for a return to a purportedly pure variant of Islam from centuries earlier. The Saudi Arabian state is the hearth of Wahhabi Islam today, as the Saudi Royal family has championed Wahhabi Islam since the 1800s. Saudis fund Wahhabi Islamic schools, called madrassas, around the world.

A variety of forces have fueled the violent path on which the Wahhabi extremist movement has embarked, but some of these forces are unambiguously geographic. Perhaps the most important is the widely held view among movement followers that “infidels” have invaded the Islamic holy land over the past 80 years. Of particular concern to Islamic extremists are the presence of American military and business interests in the Arabian peninsula, the establishment of the state of Israel, and the support European and American governments have given Israel. A principal goal of the movement is to bring an end to what are seen as improper territorial incursions. A second geographically related concern of Wahhabi extremists is the diffusion of modern culture and technology and its impact on traditional lifestyles and spiritual practices. Ridding the Islamic world of such influences is also a major goal.

Islamic fundamentalists who have resorted to violence in pursuit of their cause (thereby becoming extremists) are relatively small in number. The majority of Muslims in the Middle East do not support Islamic extremism. Pew Research (2014) reported a rise in concerns about Islamic extremism throughout the Middle East. Nigerians were increasingly concerned about Boko Haram; those surveyed in 14 Islamic countries had a majority negative opinion about Al-Qaeda; the majority of people surveyed in Pakistan opposed the Taliban; and Palestinians had majority unfavorable views of Hezbollah and Hamas.

Summary

Religion is a major force in shaping and changing culture. The major world religions today all stem from an area of Eurasia stretching from the eastern Mediterranean to China. Major world religions are distributed regionally, with Hinduism in India; Buddhism, Taoism, Shintoism, and Chinese philosophies in East and Southeast Asia; Islam reaching across North Africa, through the Middle East and into Southeast Asia; Shamanist religions mainly in Sub-Saharan Africa; and Christianity in Europe, Western Asia, the Americas, Australia, and New Zealand. Judaism, another major world religion, is not as concentrated. Today, Judaism has a base in Israel and has adherents scattered throughout Europe and the Americas.

As the 2014 Boko Haram kidnapping of 250 teenage girls in Nigeria made clear, religious beliefs can drive people to extremist behaviors. On a day-to-day basis, however, religion more typically drives cultures—shaping how people behave, how people perceive the behaviors of others, and how people across place, scale, and time interact with each other.
